

Within the scope of our growth, we are looking for our central office **Kolbermoor** for a

Project Leader / Project Manager (m/f)

Field of activity:

You will lead international projects from the client's order, conception and construction phase to installation and launch of the systems on the client's premises. Your area of responsibility will include the planning, control and monitoring of the overall progress of the project. You will select the appropriate systems, develop the corresponding concepts while checking the client-specific requirements, award contracts to suppliers in connection with procurement. You will monitor compliance with specifications and requirements as well as the achievement of the project goals (quality, deadlines, costs). You will regularly provide reports on the project status to Management, and will be available to clients as coordinator and contact person for the project.

Location:

In the company's central office Kolbermoor – in southern Germany, approximately 60 km south of Munich. Proximity to local recreation areas such as Chiemsee and the Alps with countless opportunities for winter sports and mountain hiking. Travel is 40-50% to the premises of our clients in the automotive industry, in Europe and worldwide.

Profile:

- Degree in engineering / electrical engineering / mechatronics or similar, as well as several years of professional experience in conveyor systems and automation technology (see products at www.rofa-ag.de)
- Safe handling of MS project and the current Office tools
- Great diligence and precision in daily work, assertiveness and confident behavior
- Good knowledge of oral and written German and English; the company's language is German
- Strong commitment and reliability as well as independent and autonomous way of working
- Good communication skills and capacity for teamwork
- Willingness to travel

We offer:

- An interesting, challenging task within a dedicated, open-minded team
- Secure employment position in a modern, successful company
- An open-ended employment contract with an attractive salary as well as exceptional social benefits such as a company pension, voluntary premium supplements and annual vacation allowance as well as 30 days vacation per year
